

Key Vocabulary

Seasons	There are four seasons each year. They are autumn, winter, spring and summer.
Spring	The weather starts to get warmer. Leaves begin to grow, and some trees may blossom (have flowers). Days start to have more daylight hours.
Summer	The weather gets hotter. Days in summer have the most daylight hours. Trees are full of leaves and there are lots of flowers, bees, butterflies and other insects.
Weather	Includes the temperature outside, how windy it is and rainfall (how much it rains). We can also describe cloud, snow and sun.
Daylight	When it is light outside. The amount of daylight changes with each season
Habitat	The natural home or environment of an animal or plant.
Coast	The land near a shore: seashore.
Tide	Rising and falling of the ocean
Camouflage	Some animals have colours which match their environment which protects them from being hunted.

How can we fix the commotion in the ocean?

Winter

Physical features of the seaside

A seaside resort has many natural physical features, such as the beach, the sea, cliffs and caves. This means they were made by nature.

Human features of the seaside

Human features found at the seaside might include the pier, the harbour, a lighthouse, a fairground and shops. These features are all man-made.

Microhabitats

A Rock Pool

The microhabitat of a rock pool can change as the tide comes in and out and washes water and life in and out of the pools. Some rock pools are full of life whilst others, at the back of the beach, that do not get refreshed by the tide, have less life.
